Towards 2030

The Jameel Family and the UN SDGs

Introduction

Transforming Our World

The 2030 Agenda for Sustainable Development - adopted by all United Nations Member States in 2015 - provides a shared blueprint for peace and prosperity for people and the planet, now and into the future.

At its heart building on the Millennium Development Goals are the 17 Sustainable Development Goals (SDGs) which represent a new, 15-year sustainable development agenda to create “the future we want.”

These are an urgent call for action by all countries - developed and developing - in a global partnership.

Though, strictly speaking, nonbinding, signatories are expected to adopt national SDGs frameworks that work toward achieving the goals through collaboration among the public, private and nongovernmental sectors.

They recognize that ending poverty and other deprivations must go hand-in-hand with strategies that improve health and education, reduce inequality, and spur economic growth – all while tackling climate change and working to preserve our oceans and forests.

The SDGs are underpinned by a set of 169 targets to be achieved by 2030. The role of business is fundamental, both to transition away from practices that undermine the goals’ achievement but also to proactively create solutions that solve existing challenges and drive public-private partnership.

Global investment requirements to achieve these are estimated to be of the magnitude of US\$ 5-7 trillion annually¹ and the governmental sector will require the help of business and the private sector to deliver.

Today, the Division for Sustainable Development Goals (DSDG) in the United Nations Department of Economic and Social Affairs (UNDESA) provides substantive support and capacity-building for the SDGs and their related

¹ United Nations Conference on Trade and Development, World Investment Report 2014: Investing in the SDGs— An Action Plan, April 2014.

Towards 2030

The Jameel Family and the UN SDGs

thematic issues, including water, energy, climate, oceans, urbanization, transport, science and technology, the Global Sustainable Development Report, partnerships and Small Island Developing States.

DSDG plays a key role in the evaluation of UN systemwide implementation of the 2030 Agenda and on advocacy and outreach activities relating to the SDGs. In order to make the 2030 Agenda a reality, broad ownership of the SDGs must translate into a strong commitment by all stakeholders to implement the global goals. DSDG aims to help facilitate this engagement.

Towards 2030

The Jameel Family and the UN SDGs

The Jameel Family & the Sustainable Development Goals

A Message to Our Stakeholders

As we began 2020, full of optimism for a new decade, we looked back on 2019, as a year of considerable achievement, and looked forward with anticipation to the year in which we celebrate the 75th anniversary of Abdul Latif Jameel and 75 years of our family's tradition of supporting of communities around the world.

However, no-one could have foreseen how this year would change, so dramatically and so quickly – with tragic consequences for many.

Despite the uncertainties of 2020, I am proud of our people, who achieved so much again this year. I am also humbled by the commitment and sacrifice of health workers around the world and by the pioneering work of the Jameel Institute, co-founded by Community Jameel and Imperial College, which has been such an active and positive part of the search for a solution.

Against this backdrop, we have also seen an increased momentum and energy – possibly accelerated by the pandemic – for business, philanthropy and investment to reconsider the pivotal they can play in progressing the United Nations Sustainable Development Goals.

This global agenda, laid out in 2015, is now more relevant than ever.

I am proud of the way in which we do business, and within this, our commitment to continuous improvement and to making the world a better place for all, investing in the infrastructure of life. Any anniversary this significant is not just about history; it is also about our future – and I believe we can play some contributing role to all seventeen SDGs, but for some we can have a more immediate and direct impact - it's here that we place our emphasis.

We continue to invest in a range of exciting areas, from the future of mobility, renewable energy, energy storage, water projects and health-tech. We also continue with our philanthropic efforts to make a significant difference in addressing some of mankind's greatest challenges.

Although proud of what we have achieved, we all realize there is still an enormous task ahead from poverty to climate change. The UN agenda is compelling and demands action through collaboration if we are to have a positive and lasting impact. This report offers a summary look into how we are contributing to advancing the SDGs.

Towards 2030

The Jameel Family and the UN SDGs

Introduction & History

Since the founding of the original company in 1945, our founder, the late Sheikh Abdul Latif Jameel always sought to conduct business with a deep sense of integrity and an ethical approach.

This sense of purpose, of driving positive social change, has continued to permeate and guide both commercial ventures and family philanthropy alike for more than three quarters of a century.

Overview: Commercial Activities

From modest beginnings with a small trading business in 1945, our growth has been built on the wisdom and tenacity of our entrepreneurial founder, the late Sheikh Abdul Latif Jameel, who saw that better personal transportation could empower businesses and individuals, advancing the economic development of his nation.

Our automotive story began in 1955, when, having been appointed as a Toyota distributor in Saudi Arabia, Mr. Jameel ordered four Toyota vehicles.

Over sixty-five years later, our relationship with Toyota Motor Corporation has helped us transform from a local Saudi-based company to a global diversified business.

We've grown thoughtfully – engaging new strategic partnerships and building businesses where we saw tangible possibilities for economic and social development opening new doors to investment and opportunity.

This rapid expansion and diversification, has, today, taken us to more than 30 countries on 6 continents, but always with a sense of purpose as we consider, not only short term commercial objectives, we've been inspired by vision and motivated by long-term value; investing in meaningful pursuits from which the world truly prospers.

As we journey into the future – continuing to search for opportunities to realize the potential of people, businesses and communities on a global-scale – this mindset has never been more important. In an age of short-termism, an age of *right-now*, investing in **the infrastructure of life** and **looking beyond** is what moves us forward.

Overview: Non-commercial Activities

At the same time as establishing his business the late Sheikh Abdul Latif Jameel began a family tradition of charitable giving and community projects.

Over the rest of his life, he helped tens of thousands of people, across his home country of Saudi Arabia and well beyond.

His vision lives on today in the family's portfolio of philanthropic activities: Bab Rizq Jameel, Art Jameel, Community Jameel Saudi Arabia and Community Jameel.

Across these four organizations, the Jameel family supports livelihoods, the arts and culture, education, health and climate resilience, through our own initiatives and institutions, and through partnerships with grassroots

Towards 2030

The Jameel Family and the UN SDGs

organizations and global institutions like the Victoria & Albert Museum, the Massachusetts Institute of Technology, and Imperial College London.

The Jameel Family & the UN Sustainable Development Goals

As a diversified international family organization, Abdul Latif Jameel believes it is important for us to take a meaningful and material role in contributing to the United Nations Sustainable Development Goals (SDGs).

Although across our commercial and non-commercial activities, we touch on most, if not all, of the UN SDGs, in this document we explore those in which we can have the greatest and most direct impact.

Important Note

The terms "Bab Rizq Jameel", "Art Jameel", "Community Jameel Saudi Arabia" and "Community Jameel" refer broadly to several distinct, separate and independent legal entities. None of these terms refers singly to a corporate entity, association or conglomerate run by an overarching parent company, but these terms merely refer to groups of distinct and wholly separate legal entities that are collectively and separately referred to by these terms

The term "Abdul Latif Jameel" refers broadly to several distinct, separate and independent legal entities. Abdul Latif Jameel is not itself a corporate entity, association or conglomerate run by an overarching parent company but merely refers to a group of distinct and wholly separate legal entities that are collectively referred to as Abdul Latif Jameel. Abdul Latif Jameel is not a corporate group as defined in section 1161(5) of the Companies Act 2006.

Towards 2030

The Jameel Family and the UN SDGs

Innovating for a better future:

Shaping a more inclusive society for all

Since the beginning, it has always been more than merely a business. Our late founder, Sheikh Abdul Latif Jameel born and raised in a developing country – before oil – saw business and his family's community programs as going hand in hand to create a better more inclusive society; creating opportunities for those who wanted to take them, to tackle poverty and set people in the path to economic independence.

1 NO POVERTY

1. No Poverty:

End poverty in all its forms everywhere

The Poverty Action Lab was founded in 2003 at the Massachusetts Institute of Technology (MIT) by professors Abhijit Banerjee, Esther Duflo, and Sendhil Mullainathan, with the goal of transforming how the world approaches the challenges of global poverty.

In 2005, the lab was renamed as the Abdul Latif Jameel Poverty Action Lab at MIT (J-PAL) beginning a close collaboration with Community Jameel. J-PAL is a global research center working to reduce poverty by ensuring that policy is informed by scientific evidence. Anchored by a network of 227 affiliated professors at universities around the world, J-PAL conducts randomized impact evaluations to answer critical questions in the fight against poverty. To-date, J-PAL has touched the lives of over 400 million people.

On October 14, 2019, the Nobel Prize for Economics was awarded to Esther Duflo, Abhijit Banerjee and Michael Kremer for their experimental approach to alleviating global poverty. (Esther and Abhijit are two of the cofounders and co-directors (J-PAL). Michael is one of J-PAL's original affiliated researchers.

Towards 2030

The Jameel Family and the UN SDGs

2

ZERO
HUNGER

2. Zero Hunger:

End hunger, achieve food security and improved nutrition and promote sustainable agriculture

In a world that is becoming more populated, more developed, and more urbanized, food and agriculture systems in developing and developed countries alike face growing threats to their productivity, accessibility, and sustainability. Add the effects of climate change, and these threats to the world's agriculture and food supplies are compounded.

J-PAL's Agriculture Sector focuses on improving agricultural systems in developing countries, including strategies to help farmers adopt practices and technologies that are profitable or environmentally sustainable, and programs that have the potential to better link farmers to markets.

Learn more: <https://www.povertyactionlab.org/sector/agriculture>

The gravity of the challenges to our global food system drives J-WAFS' Institute-wide, solutions-oriented approach to research and innovation. To ensure safe and resilient food supplies now and into the future, J-WAFS catalyzes new research, leads transdisciplinary studies, supports commercialization efforts, and fuels cross-institutional collaborations. The results include policy and technology innovations, supply chain interventions, new food safety technologies, and many more.

Towards 2030

The Jameel Family and the UN SDGs

3. Good Health & Wellbeing:

Ensure healthy lives and promote well-being for all at all ages

The world faces a number of pressing – and unprecedented – healthcare challenges. These include the spread of infectious disease; the need for new drugs; faster disease detection, more efficient injury and illness treatment and to reduce the gap in access to healthcare between developed and developing societies. We seek to harness the power of new technologies to transform healthcare for all, to improve health outcomes globally, and with a focus on vulnerable populations.

Co-founded in 2018, by Community Jameel and MIT, and building on MIT's pioneering history in artificial intelligence and life sciences, the Abdul Latif Jameel Clinic for Machine Learning in Health (Jameel Clinic) develops AI technologies that are changing the landscape of healthcare, from early diagnostics, drug discovery, to care personalization and management. It develops novel algorithms for modelling biological and clinical data and is making discoveries in machine learning, biology, chemistry and clinical sciences.

In 2020, Jameel Clinic announced the discovery by machine learning of a new antibacterial compound that kills many of the world's deadliest bacteria, including some strains resistant to all known antibiotics – Halicin. A world first for the use of AI.

Learn more: <https://jclinic.mit.edu>

The Abdul Latif Jameel Institute for Disease and Emergency Analytics (Jameel Institute or J-IDEA) at Imperial College London was co-founded in 2019, by Community Jameel and Imperial with the overarching mission to improve the lives of the world's populations most vulnerable to infectious disease. Jameel Institute partners with local and global actors to increase resilience to public health threats and inspire the next generation of public health professionals where they are needed most.

The Jameel Institute has been at the forefront of the SARS Cov-2 (COVID-19) response, working with governments and multilateral organisations to understand the impact of the disease on public health, economics and policy

Learn more: <https://www.imperial.ac.uk/jameel-institute/>

In 2020, with the ambition to become a leading global medi-tech distribution company, Abdul Latif Jameel Health was formed. With economic globalization, the inequality between richer and poorer countries appears to be growing, and in every corner of our planet, whole communities are denied access to healthcare - a basic human need. We believe that access should be a basic human right. Birthplace, proximity to infrastructure or lack of wealth should not deny that access, and yet for whole communities, this is the everyday reality.

Learn more: <https://aljhealth.com>

The Abdul Latif Jameel Hospital is the first of its kind in Saudi Arabia specializing in medical rehabilitation. A non-profit hospital it covers an area of 36,000m² and provides comprehensive rehabilitation and preventive care programs for pediatric and adult population. Founded in 1992, it officially opened in 1997, and runs number of pioneering programs.

Towards 2030

The Jameel Family and the UN SDGs

J-PAL's Health sector focuses on identifying policies and programs effective at improving the reach, quality, and take-up of health services and products.

Learn more: <https://www.povertyactionlab.org/sector/health>

Tanweer Program

The Tanweer Program for Orphans was launched in 2005, to make a meaningful difference for orphans and brighten their lives. It is organized by Community Jameel Saudi Arabia in partnership with the Saudi Arabian Ministry of Labor and Social Development. Tanweer rewards orphan students aged 14-17 who have achieved outstanding academic results with an annual international trip, expanding their cultural horizons and motivating them to make more progress.

Towards 2030 The Jameel Family and the UN SDGs

4 QUALITY EDUCATION

4. Quality Education

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

Education is a cornerstone on the journey toward economic independence. We aim to help provide access to quality education for those most in need, through innovations in pedagogy and technology, scholarships, mentorship, and education programs around the world.

With a commitment to break down the barriers that hold back learning, we support teachers and students, entrepreneurs and musicians, providing platforms for individual growth and systems-wide transformation.

An initiative of MIT and Community Jameel, the Abdul Latif Jameel World Education Lab (J-WEL) works with member organizations to promote excellence and transformation in education worldwide. The Lab engages educators, technologists, policymakers, societal leaders, employers, and employees through online and in-person collaborations, workshops, research, and information-sharing events. J-WEL member organizations work with MIT faculty and staff to address global opportunities for scalable change in education.

Learn more: <https://jwel.mit.edu/>

Established in 2003, Bab Rizq Jameel, (BRJ) or 'beautiful gateway to prosperity' has actively sought to match people to jobs and help create opportunities for employment as a step towards economic independence. Today, this includes BRJ Recruitment, BRJ Microfinance and BRJ Services. It also continues to offer vocational training programs in Saudi Arabia and youth-oriented 'training resulting in employment' programs.

Nafisa Shams was established in 2006, to provide women with an integrated work environment to help them produce high quality artisanal products. This is achieved through specialized training programs and production lines, including, for example the working from home program, which empowers Saudi women to achieve a balance between family responsibilities and an active role in the job market. Nafisa Shams has also launched Nafisa Shams Incubator, one of the first female business incubators, with a focus on design and crafts.

Learn more: <http://training.nafisashams.com>

The Abdul Latif Jameel-Toyota Endowed Scholarship was established in 1994 by Community Jameel to help young people achieve their potential at one of the world's leading academic institutions. Jameel-Toyota Scholars come from over 25 countries from across Asia, the Middle East and North Africa and receive financial aid for undergraduate study at the Massachusetts Institute of Technology (MIT). The scheme has helped over 190 scholars from 27 countries since 1994.

Learn more: <https://www.communityjameel.org/en/how-we-work/education/jameel-toyota-scholarship-at-mit>

Art Jameel takes a combined approach to learning and research: our arts education programs begin at primary age and continue through to post-graduate level; Art Jameel's research mandate is equally broad, and reflects our work in cultural histories, heritage and restoration through to contemporary creativity in the Middle East and beyond.

Learn more: <https://artjameel.org/learning/educational-initiatives/>

Towards 2030 The Jameel Family and the UN SDGs

The Andrea Bocelli Foundation-Community Jameel Scholarship was launched in 2019 to support students who study full-time at the Royal College of Music, London, one of the world's leading conservatoires for the performing arts. The scholarship helps talented students to overcome barriers and access world-class training.

In response to the refugee crises in Syria the Transforming Refugee Education towards Excellence (TREE) program was born. It is a collaboration between Save the Children and the MIT Abdul Latif Jameel World Education Lab (J-WEL). The initiative comprises a systems-wide teacher training program that uses compassion to help teachers overcome trauma and deliver effective teaching.

TREE was launched in 2019 with a pilot in Jordan, in collaboration with the Ministry of Education, Community Jameel, Dubai Cares and Hikma Pharmaceuticals and aims to reach 745,000 Jordanians and Syrian refugees in five years, including school children, parents and teachers

Since 2005, MITEF Pan Arab's main goal is promoting and enriching the entrepreneurship ecosystem in the Arab World, while supporting all potential startups and entrepreneurs in the Pan Arab Region through a diverse portfolio of programs and initiatives.

Learn more: <https://www.mitefarab.org>

Founded in 2005, the Saudi chapter was founded with the goal of promoting and enriching the entrepreneurship ecosystem in Saudi Arabia and aims to celebrate and support all potential startups and entrepreneurs in the Kingdom through our annual competition.

Learn more: <https://www.mitefsaudi.org>

Tanweer Program

The Tanweer Program for Orphans was launched in 2005, to make a meaningful difference for orphans and brighten their lives. It is organized by Community Jameel Saudi Arabia in partnership with the Saudi Arabian Ministry of Labor and Social Development. Tanweer rewards orphan students aged 14-17 who have achieved outstanding academic results with an annual international trip, expanding their cultural horizons and motivating them to make more progress.

Start-Up Investment Forum

The Start-up Investment Forum (SIF) is a three-day exhibition aimed at providing start-ups and small businesses from around the globe the opportunity to expand their reach into the Saudi Arabian market and to meet like-minded investors.

J-PAL's Education sector seeks to improve access to and delivery of high-quality schooling at the primary and post-primary levels through research on issues like pedagogy, teacher training, incentives (for children, for teachers, for families), school governance, early childhood development, and information and communications technology.

Learn more: <https://www.povertyactionlab.org/sector/education>

As a leading Lean Management consultancy, Four Principles is by its very nature fully engaged in the education of management across the commercial and governmental sectors to understand their operations from the perspective of the consumer – changing mindsets and there by driving efficiency and reducing waste towards responsible consumption and production (SDG12). These successes are recognized in the annual Kaizen Awards:

Learn more: <https://fourprinciples.com/kaizenawards/>

Towards 2030

The Jameel Family and the UN SDGs

5. Gender Equality

Achieve gender equality and empower all women and girls

Nafisa Shams established in 2006, to provide women with an integrated work environment and to empower Saudi Arabian women to achieve a balance between family responsibilities and an active economic role in society. It has also launched Nafisa Shams Incubator, one of the first female business incubators, with a focus on design and crafts.

Learn more: <http://training.nafisashams.com>

Gender norms and biases continue to constrain human potential around the world. J-PAL's Gender sector produces cross-cutting insights on promoting gender equality and women and girls' empowerment, and on how norms related to gender affect the outcomes of social programs.

Learn more: <https://www.povertyactionlab.org/sector/gender>

The Saudi chapter of the MIT Enterprise Forum also works to empower women and give equal opportunities for both to excel and grow their skills. The market in Saudi was dominated by men but with these programs, we have seen a huge number of female participation as founders of startups. By the end of the 4th cycle (March 2020), the program has over 7,500 applications, where 56% are men and 44% are women.

Learn more: <https://www.mitefsaudi.org>

Towards 2030

The Jameel Family and the UN SDGs

Looking Beyond:

Building a more sustainable tomorrow for ourselves and our planet

From pioneering utility-scale developments in renewable, natural, resources to quench our modern world's insatiable thirst for energy, to energy efficiency and storage solutions as we seek to support governments and societies realize their transition to a sustainable energy future.

6. Clean Water & Sanitation:

Ensure availability and sustainable management of water and sanitation for all

The world's supply of fresh water is finite and is already taxed by a rising global population and expanding world economy. One in three people worldwide lack access to safe drinking water. Climate change is poised to further stress this precious resource.

Almar Water Solutions, founded in 2016, by Abdul Latif Jameel Energy, is a provider of specialist expertise and solutions in water infrastructure development, including financing, design and operation. Its dedicated and experienced team draws on over two decades of worldwide experience in the industry and is today continuously working to develop integrated solutions to serve the growing needs of both municipal and industrial sectors.

Water scarcity and contamination are among the biggest threats the world is facing both today and in the foreseeable future. Responding to these challenges, Almar Water Solutions offers technological tailored solutions developing desalination, water treatment, wastewater treatment and recycling plants. It designs, finances and operates supply, purification and reuse projects in across all of the major sectors of industry. In partnership with the best technological associates, it uses an outsourcing model to meet the industry's water needs, with guaranteed results.

Today, Almar Water Solutions operates in over 7 countries, from Chile, to Saudi Arabia, Egypt and Kenya. Almar is building the award winning Shuqaiq III IWP, one of the world's largest reverse-osmosis desalination plants, and the second largest in Saudi Arabia that will produce over 400 million cubic meters of potable water daily, once operational. Almar has been awarded the contract to build Kenya's first large scale desalination plant in Mombasa and co-owns the Muharraq Sewage Treatment Plant in Bahrain, treating over 100,000 cubic meters daily,

Learn more: <https://almarwater.com>

The Abdul Latif Jameel Water & Food Systems Lab (J-WAFS) at MIT, co-founded by Community Jameel in 2014, firmly believes that research and innovation are essential to solving the problems of water scarcity, water quality, and access and is fueling research on sensors, purification, water use efficiency, and water production, distribution, and management, in order to find solutions to our current water challenges and to ensure clean and safe water for generations to come.

Learn more: <https://jwafs.mit.edu/what-we-do/research/water>

Towards 2030

The Jameel Family and the UN SDGs

7. Affordable & Clean Energy:

Ensure access to affordable, reliable, sustainable and modern energy for all

The future happens here

Established in 2006, and acquired by Abdul Latif Jameel Energy in 2015, Fotowatio Renewable Ventures, FRV, has been at the forefront of the global renewable energy transition.

FRV strives to surpass the limitations of conventional energy value chains, to inspire a breakthrough in society's dependency on carbon-based fuels, and to innovate and empower new ideas in the transition to clean, sustainable, reliable and low-cost models of delivering electricity to any customer in any part of the Earth.

Today Abdul Latif Jameel Energy's FRV has a presence on five continents, with a track record of developing over 50 utility-scale renewable plants and a portfolio of more than 2.5 GW in Power Purchase Agreements awarded; 1.5 GW currently operating across the globe; 2 GW in projects developed or under construction and 855 MW dc under operation and sold/spun-out, managing over US \$3.5 billion in project financing.

This equates to over 100 million tons of carbon dioxide emissions avoided; approximately 1 million homes powered.

That's equivalent to over 3 trillion trees planted, or more than 400 billion cars off the road per year, since FRV we began our journey in 2006.

Over the next four-to-six years, FRV expects investment of around US\$ 2 billion in fixed assets with the goal of increasing by more than three-fold the total installed capacity under management, going to around 3.5 gigawatts by 2025.

Towards 2030

The Jameel Family and the UN SDGs

8 DECENT WORK AND ECONOMIC GROWTH

8. Decent Work & Economic Growth:

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

J-PAL's Labor Markets sector evaluates what works to get job seekers into the workforce, to ease young people's transitions into the working world, to provide the skills entrepreneurs need to succeed, and to help businesses grow and innovate.

In addition to supporting policymakers in applying evidence from randomized evaluations to their work, sector chairs and staff write policy insights that synthesize general lessons emerging from the research, condense results from evaluations in policy publications and evaluation summaries, and fund new research through the Jobs and Opportunity Initiative.

Learn more: <https://www.povertyactionlab.org/sector/labor-markets>

Established in 2003, Bab Rizq Jameel, (BRJ) or 'beautiful gateway to prosperity' has actively sought to match people to jobs and help create opportunities for employment as a step towards economic independence. Today, this includes BRJ Recruitment, BRJ Microfinance and BRJ Services. It also continues to offer vocational training programs in Saudi Arabia and youth-oriented 'training resulting in employment' programs.

Bab Rizq Jameel Recruitment is helping match today's potential with tomorrow's opportunities through highly effective and successful employment initiatives and trainings for young male and female job seekers

Towards 2030

The Jameel Family and the UN SDGs

9 INDUSTRY, INNOVATION
AND INFRASTRUCTURE**9. Industry Innovation & Infrastructure:**

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

Investing in the 'infrastructure of life' is a cherished maxim at Abdul Latif Jameel, looking beyond a focus on short term profit and choosing to invest in businesses that leave a legacy for future generations.

The future happens here

Fotowatio Renewable Ventures, FRV, has been building and managing renewable energy infrastructure since 2006.

FRV's track records include 59 past and present renewable energy infrastructure projects across 5 continents. These include some notable firsts such as the La Jacinta solar PV plant in Uruguay, the largest in South America when commissioned; Armenia's first utility-scale solar PV plant, and the first use of Tesla Megapack battery storage and cutting edge AI at Holes Bay UK.

Learn more: <https://frv.com/en/projects>

Almar Water Solutions, FRV's sister company within Abdul Latif Jameel Energy, is a global developer of water infrastructure solutions including desalination, water and waste water treatment. See more under SDGs 6.

Learn more: <https://almarwater.com>

12 RESPONSIBLE
CONSUMPTION
AND PRODUCTION**12. Responsible Consumption & Production:**

Ensure sustainable consumption and production patterns

As a prolific and active advocate for the principles of kaizen and the reduction of waste and wasteful processes, Four Principles is active across the Middle East in providing consultancy and training to drive both commercial and governmental sector activity towards a zero waste.

Their approach is grounded in the basic Principles of Lean:

- Define value from the standpoint of the customer
- Identify value and remove waste
- Replace waste with value
- Continuously improve

This is enabling government and business to adopt responsible consumption and production practices. Not cost-cutting for its own sake, but the process of embedding long term, sustainable efficiencies that eliminate waste, improve returns and at the create value for the customer.

Learn more: <https://fourprinciples.com>

Towards 2030 The Jameel Family and the UN SDGs

13 CLIMATE ACTION

13. Climate Action:

Take urgent action to combat climate change and its impacts

We face overwhelming evidence that our planet's rapidly changing climate is materially challenging water, food, and agriculture systems around the world. Changes in temperature, precipitation patterns, and pest populations and weather extremes are expected to increase in frequency and intensity as a result of the climate crisis. Taken together, these factors present extraordinary threats to water and food security and one of the greatest challenges we face.

Abdul Latif Jameel Energy's flagship renewable energy business, FRV has a portfolio of utility scale renewable energy projects in solar, wind and energy storage that today powers around 1 million homes worldwide, avoiding 100 million tons of carbon dioxide emissions every year – that's equivalent to over 3 trillion trees planted, or more than 400 billion cars off the road per year, since FRV we began our journey in 2006.

Almar Water Solutions' breadth of capability and portfolio of projects is positively contributing to the more sustainable management of the world's freshwater supply through desalination, water and waste-water treatment.

Learn more: <https://almarwater.com>

It is a J-WAFS priority to drive research and innovation to help ensure the resilience of the world's water and food systems even as they are increasingly pressured by the effects of climate change. This is as varied as the development of low-carbon desalination technologies and the application of remote sensing and data analytics to assess agriculture vulnerability to climate change, J-WAFS marshals MIT resources to meet these complex, and varied challenges with actionable knowledge and solutions.

The resilience of each of these intersecting systems is at stake, as is the sustainability of the earth's ecosystems on which they depend.

This work also impacts SDGs 6 (Clean Water & Sanitation) and SDGs 15 (Life in land).

The J-WAFS Solutions program is administered by J-WAFS in partnership with the MIT Deshpande Center for Technological Innovation. Since 2015, this grant program has provided funding and facilitated mentor relationships with industry leaders in order to help MIT faculty and students commercialize breakthrough water and food sector technologies and inventions by transforming promising ideas at MIT into innovative products and cutting-edge spinout companies

J-PAL's Environment, Energy, & Climate Change Sector measures the real-world impacts of energy and environmental policies, particularly on energy access, pollution reduction, and climate change mitigation and resilience.

Towards 2030

The Jameel Family and the UN SDGs

17 PARTNERSHIPS FOR THE GOALS

17. Partnerships for the Goals:

Strengthen the means of implementation and revitalize the global partnership for sustainable development

At the heart of the Jameel family's approach to both commercial and philanthropic endeavors is the spirit of partnership.

Over the past three quarters of a century, the Jameel family have built diverse and wide-ranging alliances based on respect, shared values and a mutual vision of creating tangible value for the future of human society.

This strengthens both our business and enables our ability to innovate for a better future. This is even more true in our partnerships to collectively and materially contribute to the UN Sustainable Development Goals.

The reach and impact already achieved would be impossible without the commitment, expertise and resources of our partners — from business alliances, to our clients; from suppliers to non-governmental organizations; science and academia and also in our investments.

Through Bab Rizq Jameel, Art Jameel, Community Jameel Saudi Arabia (including the Abdul Latif Jameel Hospital) and Community Jameel, we partner with universities, municipal leaders, community organizations, arts foundations and youth. Through Abdul Latif Jameel, success depends on our mutually beneficial partnerships and alliances.

These partnerships, among many others, provide a glimpse of how our work enables SDGs target 17.

Together we are looking beyond and working to innovate for a better future.

Towards 2030

The Jameel Family and the UN SDGs

Appendix I: Visual Summary of SDGs by Commercial Entity

The table below provides a simple overview of the commercial activities of the Jameel family, including those of Abdul Latif Jameel businesses, including FRV flagship renewable energy company, Almar Water Services and others, together with the **key** UN Sustainable Development Goals with which they are most strongly aligned and on which they have a material impact.

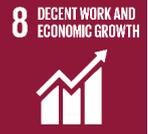

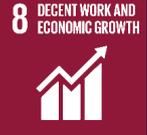

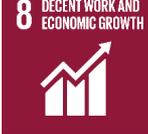

Opening New Doors – Partnerships for the Goals				
Abdul Latif Jameel is – either through direct operations strategic partnerships – directly impacting 9 of the 17 United Nations Sustainable Development Goals:				
Abdul Latif Jameel  1945 - 2020 				
Abdul Latif Jameel Health				
Abdul Latif Jameel HEALTH 				
Abdul Latif Jameel Energy and Environmental Services				
 The future happens here				
	 ALMAR WATER SOLUTIONS			
Other Activities				
 An Abdul Latif Jameel Company

The terms "Bab Rizq Jameel", "Art Jameel", "Community Jameel Saudi Arabia" and "Community Jameel" refer broadly to several distinct, separate and independent legal entities. None of these terms refers singly to a corporate entity, association or conglomerate run by an overarching parent company, but these terms merely refer to groups of distinct and wholly separate legal entities that are collectively and separately referred to by these terms..

The term "Abdul Latif Jameel" refers broadly to several distinct, separate and independent legal entities. Abdul Latif Jameel is not itself a corporate entity, association or conglomerate run by an overarching parent company but merely refers to a group of distinct and wholly separate legal entities that are collectively referred to as Abdul Latif Jameel. Abdul Latif Jameel is not a corporate group as defined in section 1161(5) of the Companies Act 2006.

This document may contain forward-looking statements. Forward-looking statements are statements regarding matters other than historical fact, such as future results, events, activities, developments or circumstances or the beliefs, plans or expectations of Abdul Latif Jameel entities or their respective managements. Forward-looking statements often can be identified by the use of words such as 'expect', 'project', 'anticipate', 'plan', 'estimate', 'believe', 'predict', 'intend', 'potential', 'possible', 'probable', 'likely', 'forecast', 'guidance', 'outlook', 'goal', 'target', 'may', 'will', 'should' or 'could' or other similar terms or phrases. However, the absence of such words does not mean that a particular statement is not forward looking.

Forward-looking statements are based on expectations and assumptions at the time of such statements and are subject to numerous risks and uncertainties, many of which are outside the control of Abdul Latif Jameel entities. Should any of such expectations or assumptions prove incorrect, or should any of such risks or uncertainties materialize, actual future results, events, activities, developments or circumstances may differ materially from those expressed in or implied by forward-looking statements. Further, any forward-looking statement speaks only as of the date on which it is made, and Abdul Latif Jameel do not assume, and hereby disclaims, any obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise.

All forward-looking statements made by Abdul Latif Jameel, or by any person on behalf of any of them, whether communicated in writing, electronically or orally, are qualified in their entirety by the foregoing cautionary statements.
